Community Service Record - Type of Activity & Dates Involved

A major component of the YES program is personally volunteering for 10 hours of local community service every month from October through May. At least 5 of these hours must be at the same site each month; one that provides you an opportunity to have a significant impact and build relationships with people you would not normally encounter. This is called your Primary Service Site. Where do you think you would volunteer for your 40 hours of primary service?

Why would you choose that place?

Local Rotary Clubs are able to sponsor a limited number of students. They provide \$1,000 towards the materials for the international service project and \$1,000 towards the student's \$2,500 program fee. You are required to raise the remaining \$1,500 whether through parental donations, relatives, selling YES raffle tickets, or other fundraising activities. Please describe how you anticipate raising the \$1,500.

What attracted you to the YES program?

What special skills, strengths, and talents could you contribute to the Team, both locally and during the international service project?

Volunteering, fundraising, and monthly team meetings can easily require an average of 5 hours of your time every week. What is your plan for fitting this into your schedule?

**You will be contacted to arrange for a personal interview.**
